

0.3 - Introduction to Minitab

The Minitab program is required as part of this course. Install the software and enjoy this versatile statistical software which includes clear help explanations and easy-to-understand printouts.

To begin Minitab, double-click on the Minitab icon on your desktop or select Minitab from the program folder.

Interface

As is typical in most software programs, the menus are found at the top of the application window. With the Minitab application two windows are also opened by default: the session window and a worksheet. The active window has a blue title bar and other windows have a gray title bars. If you want one of the other windows to be the active window, just click on it.

- **Session Window:** The session window displays non-graphical outputs such as tables of statistics and character graphs. (If the Session window is not open, select Session from the Window menu to open the window.) You can edit the Session window.
- **Worksheet Window:** This is the window where we enter, name, view, and edit data. The data for each variable is stored in a different column. At the top of each column is a blank cell for specifying the name of the variable. You can simply click on a cell at the top and enter the name.

Entering Data

Note! Users accessing Minitab via Penn State's RemoteApps or WebApps will not be able to use this copy and paste technique. Instead all files must be uploaded into your PASS space and open these files in Minitab from this location in PASS. See [WebApps](#) on the STAT Online site for more information.)

- **Entering Data (entering manually):** Activate a Worksheet window by clicking once in it. Click the cell where you want to enter the data and type it in. Use [Enter], the mouse, or arrow keys to move to different cells. If an observation is entered incorrectly, simply make that cell active again and type in the correct value.
- **Entering Data (importing from a file):** There are basic ways to enter data into the Minitab worksheet. Here are two of the most common...
 - **Copy and Paste:** Choose **File** > **Open Worksheet**. For example, if you want to add data values from a data file or from an Excel spreadsheet, one simple way to do this is to open that file, highlight the portion you want to add, then select Copy from the Edit menu. Go back to Minitab, activate the cell you want to paste the data into, then select Paste from the Edit menu.
 - **Import Files:** Select the **Open Worksheet** option in the **File** menu in Minitab. Select the type of file that you are looking to import, (this could be a Minitab file, text file, Excel file, etc.). Locate and then import this file into the Minitab worksheet.

Minitab Resources

- [Minitab tutorial](#) on the STAT Online site.
- Minitab support provides useful guides to get you started with the basic operations. Please reference the following guides to get started in Minitab: [Getting Started with Minitab](#)

Lessons

[Lesson 0: Overview](#)

- [0.1 - What is Statistics?](#)
- [0.2 - Foundations](#)
- [0.3 - Introduction to Minitab](#)

[Lesson 1: Collecting and Summarizing Data](#)

- [1.1 - Collecting Data](#)
- [1.2 - Classifying Data](#)
- [1.3 - Summarizing One Qualitative Variable](#)
- [1.4 - Graphing One Qualitative Variable](#)
- [1.5 - Summarizing One Quantitative Variable](#)
- [1.6 - Graphing One Quantitative Variable](#)
- [1.7 - Lesson 1 Summary](#)

[Lesson 2: Probability](#)

- [2.1 - Notation](#)
- [2.2 - Set Notation and Operations](#)
- [2.3 - Interpretations of Probability](#)
- [2.4 - Probability Properties](#)
- [2.5 - Conditional Probability](#)
- [2.6 - Independent Events](#)
- [2.7 - Bayes' Theorem](#)
- [2.8 - Lesson 2 Summary](#)

[Lesson 3: Probability Distributions](#)

- [3.1 - Random Variables](#)
- [3.2 - Discrete Probability Distributions](#)
- [3.3 - Continuous Probability Distributions](#)
- [3.4 - Lesson 3 Summary](#)

[Lesson 4: Sampling Distributions](#)

- [4.1 - Sampling Distribution of the Sample Mean](#)
- [4.2 - Sampling Distribution of the Sample Proportion](#)
- [4.3 - Lesson 4 Summary](#)

[Lesson 5: Confidence Intervals](#)

- [5.1 - Introduction to Inferences](#)
- [5.2 - Estimation and Confidence Intervals](#)
- [5.3 - Inference for the Population Proportion](#)
- [5.4 - Inference for the Population Mean](#)
- [5.5 - Lesson 5 Summary](#)

[Lesson 6a: Hypothesis Testing for One-Sample Proportion](#)

- [6a.1 - Introduction to Hypothesis Testing](#)
- [6a.2 - Steps for Hypothesis Tests](#)

[6a.2 - Set-Up for Hypotheses Tests](#)

[6a.3 - Set-Up for One-Sample Hypotheses](#)

[6a.4 - Hypothesis Test for One-Sample Proportion](#)

[6a.5 - Relating the CI to a Two-Tailed Test](#)

[6a.6 - Minitab: One-Sample \$p\$ Hypothesis Testing](#)

[6a.7 - Lesson 6a Summary](#)

[Lesson 6b: Hypothesis Testing for One-Sample Mean](#)

[6b.1 - Steps in Conducting a Hypothesis Test for \$\mu\$](#)

[6b.2 - Minitab: One-Sample Mean Hypothesis Test](#)

[6b.3 - Further Considerations for Hypothesis Testing](#)

[6b.4 - More Examples](#)

[6b.5 - Lesson 6b Summary](#)

[Lesson 7: Comparing Two Population Parameters](#)

[7.1 - Difference of Two Independent Normal Variables](#)

[7.2 - Comparing Two Population Proportions](#)

[7.3 - Comparing Two Population Means](#)

[7.4 - Comparing Two Population Variances](#)

[7.5 - Lesson 7 Summary](#)

[Lesson 8: Chi-Square Test for Independence](#)

[8.1 - The Chi-Square Test for Independence](#)

[8.2 - The 2x2 Table: Test of 2 Independent Proportions](#)

[8.3 - Risk, Relative Risk and Odds](#)

[8.4 - Lesson 8 Summary](#)

[Lesson 9: Linear Regression Foundations](#)

[9.1 - Linear Relationships](#)

[9.2 - Simple Linear Regression](#)

[9.3 - Coefficient of Determination](#)

[9.4 - Inference for Correlation](#)

[9.5 - Multiple Regression Model](#)

[9.6 - Lesson 9 Summary](#)

[Lesson 10: Introduction to ANOVA](#)

[10.1 - Introduction to Analysis of Variance](#)

[10.2 - A Statistical Test for One-Way ANOVA](#)

[10.3 - Multiple Comparisons](#)

[10.4 - Two-Way ANOVA](#)

[10.5 - Summary](#)

[Lesson 11: Introduction to Nonparametric Tests and Bootstrap](#)

[11.1 - Inference for the Population Median](#)

[11.2 - Introduction to Bootstrapping](#)

[11.3 - Summary](#)

[Lesson 12: Summary and Review](#)

[12.1 - Summary of Statistical Techniques](#)

[12.2 - Choose the Correct Statistical Technique](#)
